TECH SCIENTISTS TO LEAD OVERSEAS DELEGATION

For Immediate Release

ATLANTA, GA....James C. Wiltse and Julian W. Dees of Georgia Tech's Engineering Experiment Station have been selected to lead a delegation of American scientists who will visit several western European countries and the Soviet Union, April 12 - May 3, 1980.

Sponsored by the "People to People" program, the trip is intended to foster international goodwill and provide a forum for the exchange of scientific information. The invited delegates will be electronics experts, primarily in the field of microwaves. They will meet with government officials and scientists in cities throughout the Netherlands, West Germany, the Soviet Union, Denmark and Norway. The trip will include inspections of several electronics laboratories and related technological facilities. The size of the delegation will be limited to approximately 38 people, including spouses.

Wiltse and Dees, the delegation hosts, are both microwave electronics specialists. Dr. Wiltse directs the electronics laboratories of Georgia Tech's Engineering Experiment Station. Mr. Dees is director of the EES Electromagnetics Laboratory.

People to People International is a private organization with headquarters in Kansas City, Mo. Founded in 1956 by President Dwight D. Eisenhower, the organization strives to reduce international hostilities by fostering friendships and understanding among citizens of all nations.

Electronics professionals interested in becoming members of this delegation may apply by writing or calling James C. Wiltse or J.W. Dees at the Georgia Institute of Technology in Atlanta, Ga. 30332/ (404) 894-3494, -3500.
